Trans. of la Rivista [dei] Combustibili (Italy) 1957,
v. 11, p. 245-259.

A method based on the preparation of mixtures com-
posed of aromatic extracts under examination with
saturated oil (non-aromatic) of known structural com-
position, having a molecular weight of the same order,
is proposed for the determination of the structural
composition of aromatic extracts derived from the
refining of lubricating oils, whose high content of $\frac{1}{2}$ C₁₄
with respect to C₁₂ does not permit the direct appli-
cation of the equations and nomographs pertinent to
fractions of "natural" petroleum. The physical con-
stants are determined and the structural composition
